DETAILED ACTION

1. Claims 1-4,43-46 have been examined.

Election/Restrictions

2. Applicant's election without traverse of claims 1-4,43-46 in Paper No. 14 is acknowledged.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-4, 43-46 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6327578 to Linehan.

Referring to claims 1 and 43, Linehan discloses receiving a transaction request from a user at a server, issuing a challenge to the user, receiving a response from the user based upon said challenge, processing said response to verify an instrument/user, receiving a second request from said user, said second request including said portion of said credentials and validating aid portion of said credentials with a key to provide access to a transaction service (see col. 7, lines 20-37; fig. 2c; col. 1, lines 33-37). As per the steps of assembling credentials for the transaction, said credentials comprising at least one key and providing at least a portion of said credentials to said user, these are inherent steps. That is, Linehan discloses the step of receiving a second

Art Unit: 3621

request including a credential and validating the credential, which implies that credentials comprising at least one key was assembled and provided to the user. Thus, the assembling and providing credentials are prerequisites for the receiving a second request [including the credentials] and validating the credentials.

Referring to claims 2,3,44 and 45, Linehan discloses the transaction is an electronic purchase transaction conducted using a digital wallet (see abstract, lines 1-4).

Referring to claim 4 and 46, Linehan discloses the instrument is a smart card (see col. 7, lines 21-23).
